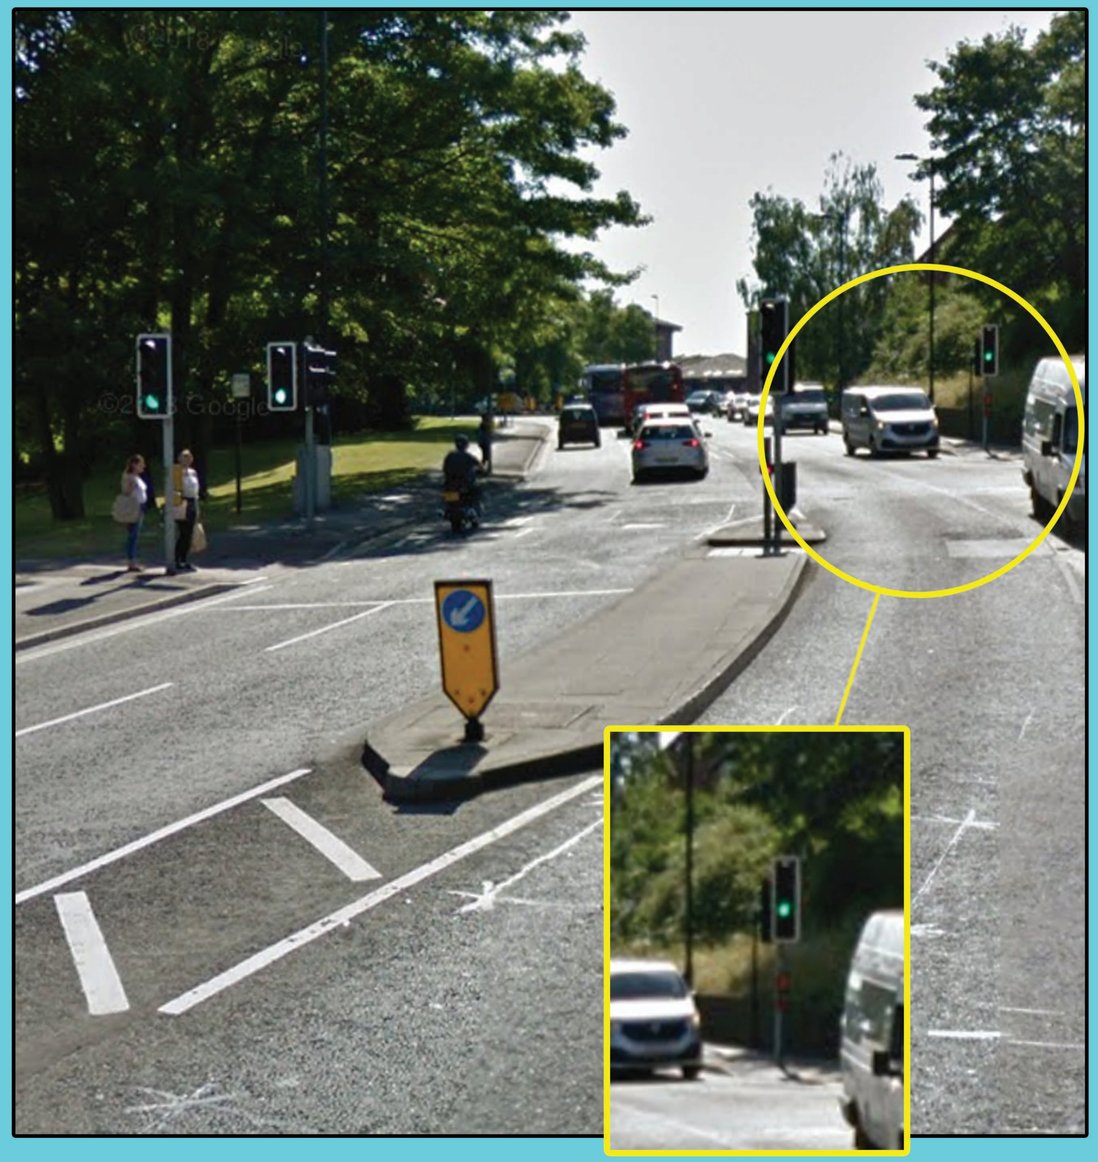
TRICKY ROADS CROSSROADS & GREEN FILTER LIGHTS


If you are turning right at 'traffic light controlled' crossroads, you do not have to wait for the green 'right arrow'! You must emerge into the centre of the crossroads and wait for a break in the oncoming traffic. Make sure you do not drive too far forward, as oncoming traffic may wish to turn in front of you. The green filter arrow is a 'bonus' and usually means oncoming traffic has been stopped.
